WEDDELL SEA - IN SEARCH OF THE EMPEROR PENGUIN INCL. HELICOPTERS

A true expedition, our Weddell Sea cruise sets out to explore the range of the Emperor Penguins near Snow Hill Island. We will visit the area via helicopter and see a variety of other birds and penguins including Adélies and Gentoos. You may sail into the Weddell Sea via the Antarctic Sound. Here huge tabular icebergs herald your arrival to the eastern side of the Antarctic Peninsula. During this part of the cruise, the search is on for emperor penguins. Using both the vessel and helicopters, there's a good chance you'll find them. You might also enjoy scenic flights, and if conditions allow, helicopter landings in locations otherwise out of reach this time of year. Helicopter flights are a true trip changer, and may include: The west slopes of the Antarctic Sound – The western side of this area is only rarely seen from the air, though the landscape is truly worth the flight: Layered sandstones, lava flows, glaciers, icebergs, and pack-ice extend as far as the eye can see. There are often individual emperor penguins and Adélie penguins on the ice floes, as well as kelp gulls, skuas, and various breeds of petrel. Jagged mountain peaks stab through the snow, and enormous walls of ice lie shattered on the slopes below. Duse Bay – A soaring helicopter flight may deposit you on a rocky hillock close to an old refuge hut overlooking this bay. There's still a lot of snow and ice this time of year, but much of the walk in this location is over frost-shattered rock covered with lichen of all shapes and colors. Seymour Island – This is where the Swedish Antarctic Expedition of 1901 – 4 wintered under harrowing polar conditions. Sedimentary rock, fossils, and expansive views define this location. If conditions allow for deeper ventures into the Weddell Sea, Zodiac trips may include: Devil Island – Home

to a large colony of Adélie penguins, this island offers a magnificent vantage point for hikers willing to foot it to the top of the hill. Melting ice sometimes forms a waterfall dropping from the cliffs close to Cape Well-met. Brown Bluff – Maybe the most scenic location in the entire northern tip of the Antarctic Continent: sheer canyon walls, fallen boulders, beautiful volcanic creations capped with ice. A large Adélie penguin rookery lives here, with gentoo penguins and nesting snow petrels also to be found. Gourdin Island – Chinstrap, gentoo, and Adélie penguins love this island, which is yet another landing option for your continuing Antarctic adventure. Esperanza Base – This Argentine research station, which operates year-round and is one of only two civilian settlements in Antarctica, could serve as an alternative landing site.

Day 1: End of the world, start of a journey

Your voyage begins where the world drops off. Ushuaia, Argentina, reputed to be the southernmost city on the planet, is located on the far southern tip of South America. Starting in the afternoon, you embark from this small resort town on Tierra del Fuego, nicknamed "The End of the World," and sail the mountain-fringed Beagle Channel for the remainder of the evening.

Day 2 - 3: Path of the polar explorers

Over the next two days on the Drake Passage, you enjoy some of the same experiences encountered by the great polar explorers who first charted these regions: cool salt breezes, rolling seas, maybe even a fin whale spouting up sea spray. After passing the Antarctic Convergence – Antarctica's natural boundary, formed when north-flowing cold waters collide with warmer sub-Antarctic seas – you are in the circum-Antarctic upwelling zone. Not only does the marine life change, the avian life changes too. Wandering albatrosses, grey-headed albatrosses, black-browed albatrosses, light-mantled sooty albatrosses, cape pigeons, southern fulmars, Wilson's storm petrels, blue petrels, and Antarctic petrels are a few of the birds you might see.

Day 4 - 7: Entering Antarctica

You may sail into the Weddell Sea via the Antarctic Sound. Here huge tabular icebergs herald your arrival to the eastern side of the Antarctic Peninsula. During this part of the cruise, the search is on for emperor penguins. Using both the vessel and helicopters, there's a good chance you'll find them. You might also enjoy scenic flights, and if conditions allow, helicopter landings in locations otherwise out of reach this time of year. Helicopter flights are a true trip changer, and may include: The west slopes of the Antarctic Sound – The western side of this area is only rarely seen from the air, though the landscape is truly worth the flight: Layered sandstones, lava flows, glaciers, icebergs, and pack-ice extend as far as the eye can see. There are often individual emperor penguins and Adélie penguins on the ice floes, as well as kelp gulls, skuas, and various breeds of petrel. Jagged mountain peaks stab through the snow, and enormous walls of ice lie shattered on the slopes below. Duse Bay – A soaring helicopter flight may deposit you on a rocky hillock close to an old refuge hut overlooking this bay. There's still a lot of snow and ice this time of year, but much of the walk in this location is over frost-shattered rock covered with lichen of all shapes and colors. Seymour Island – This is where the Swedish Antarctic Expedition of 1901 – 4 wintered under harrowing polar conditions. Sedimentary rock, fossils, and expansive views define this location. If conditions allow for deeper ventures into the Weddell Sea, Zodiac trips may include: Devil Island – Home to a large colony of Adélie penguins, this island offers a magnificent vantage point for hikers willing to foot it to the top of the hill. Melting ice sometimes forms a waterfall dropping from the cliffs close to

Cape Well-met. Brown Bluff – Maybe the most scenic location in the entire northern tip of the Antarctic Continent: sheer canyon walls, fallen boulders, beautiful volcanic creations capped with ice. A large Adélie penguin rookery lives here, with gentoo penguins and nesting snow petrels also to be found. Gourdin Island – Chinstrap, gentoo, and Adélie penguins love this island, which is yet another landing option for your continuing Antarctic adventure. Esperanza Base – This Argentine research station, which operates year-round and is one of only two civilian settlements in Antarctica, could serve as an alternative landing site.

Day 8: Drake via Deception Island

In the morning, you sail to Deception Island for the last landing of the voyage, either at Pendulum Cove or Whalers Bay. Conditions on the Drake Passage determine the exact time of departure.

Day 9 - 10: Familiar seas, familiar friends

Your return voyage is far from lonely. While crossing the Drake, you're again greeted by the vast array of seabirds remembered from the passage south. But they seem a little more familiar to you now, and you to them.

Day 11: There and back again

Every adventure, no matter how grand, must eventually come to an end. It's now time to disembark in Ushuaia, but with memories that will accompany you wherever your next adventure lies.

Day 5 - 6: (Alternate program if the route to Snow Hill Island is free of multi-year pack ice – less than 50 % probability)

Helicopters provide an advantage in reaching the emperor penguin colony, but nature makes the rules in Antarctica. If conditions are favourable, you'll spend the first two days at the penguin rookery. The helicopter operation takes a full day, and the flight duration is approximately 15 minutes. Each helicopter can accommodate 4 – 6 passengers per flight, and the landing site is carefully chosen so that the penguins are not disturbed. Upon arrival to the site, it is about a 45-minute walk to the rookery. Please keep in mind that you are in the world's most remote area: There are no guarantees. Conditions may change rapidly, which can have a profound impact on our helicopter operations. It is important to understand and respect this. Safety is our greatest concern, and no compromises can be made.

YOUR SHIP: ORTELIUS

YOUR SHIP:	Ortelius
VESSEL TYPE:	Expedition
LENGTH:	91m
PASSENGER CAPACITY:	108-123
BUILT/REFURBISHED:	

Built / Refurbished : 1989 / 2015

Ortelius was originally the Marina Svetaeva. Built in Gdynia, Poland in 1989, it served as a special-purpose vessel for the Russian Academy of Science. Later it was re-flagged and renamed after the Dutch/Flemish cartographer Abraham Ortelius (1527 - 1598), who in 1570 published the first modern world atlas: Theatrum Orbis Terrarum or Theater of the World. At that time his atlas was the most expensive book ever printed. Ortelius is classed by Lloyd's Register in London and flies the Dutch flag.

Perfect for Any Expedition

The vessel has the highest ice-class notation (UL1, equivalent to 1A) and is therefore suitable to navigate in solid one-year sea ice as well as loose multi-year pack ice. Ortelius can accommodate up to 108 passengers and has an abundance of open-deck spaces. It is manned by 24 highly experienced nautical crew members, 20 hotel staff, eight expedition specialists (one expedition leader, one assistant, and six lecturer-guides), and one doctor.

Ortelius: a Vessel with Comfort and Character

Please be aware that a small number of cabins may have a

partially obstructed view due to the size of the windows and the design requirements of the ship. For example, some windows may be partly obstructed in the lower half by a gangway. The best view is always on the outer deck or the bridge. Though our voyages are primarily meant to offer our passengers an exploratory wildlife program with as much time ashore as possible, Ortelius offers all the comforts of a standard hotel along with a bar and lecture room. Flexibility assures maximum wildlife opportunities. As such, Ortelius carries 10 Zodiacs with 60hp Yamaha engines.

Age & Nationality

Passengers on a typical voyage range from in their 30s to their 80s, with the majority usually between 45 - 65. Our expeditions attract independent travelers from around the globe who are characterized by a strong interest in exploring remote regions. The camaraderie that develops on board is an important part of the Oceanwide experience, and many passenger groups include several nationalities.

What to Wear

In keeping with the spirit of expedition, dress on board is informal. Bring casual and comfortable clothing for all activities, and keep in mind that much of the scenery can be appreciated from deck which can be slippery. Bring sturdy shoes with no-slip soles, and make sure your parka is never far away in case one of our crew shouts "Whales!" over the loudspeaker and you have to dash outside in a moment's notice. Opt for layers, as it is comfortably warm aboard the ship though often cold on deck.

How to Pay

wildearth-travel.com

info@wildearth-travel.com

Refreshments and souvenirs will be charged to your cabin. The day before departure you can settle your bill with the hotel manager, paying by credit card (Visa or MasterCard) or cash (euro, or in some cases dollar). We cannot, however, accept checks. Though the prices and standard currency on board is in the euro, other currencies may be accepted at the discretion of the hotel manager, at prevailing rates.

Electric Current

The electrical supply aboard ship is 220v, 60Hz. Electrical outlets are standard European with two thick round pins, so some passengers may need a 220v/110v converter.

Gratuities

The customary gratuity to the ship's service personnel is made as a blanket contribution at the end of the voyage and is divided among the crew. Tipping is a personal matter, and the amount you wish to give is at your sole discretion. As a generally accepted guideline, we suggest 8 – 10 euros per passenger per day. It is better for the crew if you give cash.

Non-Smoking Policy

We have a non-smoking policy inside all our vessels, though you can smoke in certain designated areas. We ask that you please respect the wishes of non-smokers.

Your Physical Condition

You must be in good overall health and be able to walk several hours per day. The expedition is ship-based and physically not very demanding, but we spend as much time as possible on shore. You are, however, welcome to remain aboard the ship if you prefer. To join most excursions you must be able to get up and down the steep gangway from the ship to the water level to board the Zodiacs. Staff will assist you in and out of the boats, and boarding will become progressively easier with

practice, but conditions on shore can be slippery and rocky. Remember, you will be traveling in remote areas without access to sophisticated medical facilities, so you must not join this expedition if you have a life-threatening condition or need daily medical treatment.

treatment.
